ABOUT ME

Portfolio website - - Tejeswaar.me

Game Systems Programmer and Technical Artist specializing in gameplay systems, engine development, and real-time rendering. Experienced in C++ and SDL for low-level systems, with Unreal Engine expertise in GAS-based gameplay architecture. Focused on building scalable, high-performance game systems.

EDUCATION

IACG MULTIMEDIA COLLEGE- TS

BA(Hons) Multimedia - Gaming
2022-2026

ANU VOCATIONAL COLLEGE-AP

Intermediate - CSE + Bridge MPC - B
2020-2022

SVCHS-AP

High School Education - **9.8/10**
2018 - 2020

SKILLS

- **Programming:** C++, C#
- **3D Tools:** Blender, Maya, Substance Painter
- **Gameplay:** Mechanics, Input, State Machines
- **Systems:** ECS, Architecture, Modular Design

EXPERTISE

- **Game Engines:** Unreal Engine (GAS & BP), Unity
- **Graphics & Engine:** SDL2, GLM, ECS
- **UI/Audio:** HUD, Menus, SFX
- **Optimization:** Performance Profiling, Asset Optimization

PROJECTS

LAND OF SOULS

Unreal Engine 5 | Gameplay Ability System (**GAS**) — **2025-Present**

- Architected modular combat system using Gameplay Ability System (GAS)
- Implemented combo logic, stamina mechanics, and cooldown management
- Designed environment assets & boss encounters with UE5 + Quixel optimized for performance
- Optimized real-time rendering for target platforms

Retina Engine

Present

Custom 2D Game Engine

- Engineered modular 2D engine in C++ with SDL2, GLM, and Dear ImGui
- Implemented ECS architecture with rendering pipeline and input systems
- Focused on low-level graphics programming and performance optimization

EXPERIENCE

Tharros Game Studio (Volunteer) — Game Systems Programmer — **2025-2026**

- Engineered core gameplay loop in Unity with merge mechanics, progression, and fail states
- Architected in-game economy and monetization systems (shop, currency, rewards)
- Developed scalable UI systems for gameplay and user interaction
- Implemented event-driven audio system enhancing player feedback
- Shipped Mix Mash to Google Play Store - **Achieved 10,000+ downloads** with strong retention

[Mix Mash - Google Play](#)

IACG Multimedia - Jr Game Developer

Present

- Developed a cognitive math puzzle game in Unity with a procedural generation system that dynamically constructs formulas, number sequences, and adaptive puzzle patterns for replayable gameplay experiences.
- Prototyped an auto-battler in Cocos — designed sprite assets, grid spawner, and attack logic while tuning unit balance for core combat feel.
